Officer **P07 SCOTT A. DEGROOT** Date **11/27/2015**

While in the ER on an unrelated case I was advised by ER staff Eickmeier had just entered the ER requesting her daughter, Madeline be seen as she just returned from a visit with her father and has

"gunk smell" to her vagina and she believes her father is doing something to cause this. I was also informed Eickmeier was seeking a rape kit be done. I informed staff and ER Dr. Sabir and the previous complaints and then showed him this case file. Staff that spoke with Eickmeier found her stories to be unbelievable. I advised ER staff I needed to respond to the police station for something and would returned shortly.

I called DCFS and informed them of the situation and they stated a case worker would call back shortly.

While at the police station Eickmeier called and spoke with Sgt. Piscia again. She advised him she had left the ER because the doctor refused to help her. She stated the doctor seemed to be just some guy off the street that did not have a clue to what he was doing.

I returned to the ER and spoke with Dr. Sabir. Dr. Sabir stated he spoke with Eickmeier and she seemed to be "on a destructive path". He advised he offered to exam the child and Eickmeier told him she did not want her to be examined, but wanted it "wrote down" and "documented" that she smelled the childs vagina and smelled like semen. Dr. Sabir stated he was concerned for the childs safety. I advised him I had called DCFS already and was waiting for a return call. I advised him I would pass the information along that he had provided.

I received a call back from DCFS and explained to them everything that has occurred. I also advised DCFS that myself, Sgt. Piscia, Dr. Sabir and the ER staff that we were concerned Eickmeier's behavior was quickly getting worse and more erratic and that we felt it was just a matter of time until she might molest the child herself just to prove the child is being molested. I informed her it was our opinion the child needed to be taken into protective custody. DCFS stated she was going to call a case worker and label the incident "option needed" and someone would call me back shortly.

A short time later case worker Mark Jenkins called and was informed of the todays incidents. He stated to continue to document everything as they are working with the SA's office to come up with a solution.
